

6.08 **WATER SUPPLY CHARGE**

In order to finance projects to meet new system demand, every applicant or developer who installs, modifies, adds to an existing service, or changes the type of land or site use must pay a Water Supply Charge for each parcel of land that is benefited from such installation, modification, addition, or change in land use. This charge is in addition to any and all other charges and requirements set forth by the District and will be deposited in a special fund known as the Water Supply Charge Fund; monies from this fund are to be utilized for the construction of water supply projects, recycled water irrigation retrofits, and water conservation projects, as approved by the Board.

- 6.08.01 **Determination of Charges:** The Water Supply Charge is computed on the basis of water demands for the land area being developed and varies by type of land use, i.e., residential, commercial, or industrial. The charge shall be determined based on the area being developed and the applicable water demand factor for the type of development. Determination of such land use, water demand factor, and area of benefit shall be made by the General Manager. The charges shall be as set forth in Appendix C.

- 6.08.02 **Credits:** In instances where there is a modification of service or a change in land or site use and the Water Supply Charge has been previously paid by the owner or predecessor, the amount of such previously paid charge shall be credited against the current charge based on current or proposed land use and/or modification of service (also refer to Article 4.06).
