

6.10 CONTRIBUTIONS FOR EXISTING FACILITIES

Wherever any water line of the District constructed exclusively by the use of Acreage Supply Charge Funds now exists, or is hereafter placed adjacent to any parcel of property through which water may be served to parcels abutting on said line, in addition to the Acreage Supply Charge herein provided to be paid, there shall be paid at the time service is required to such parcel a contribution on the existing main and other facilities, such as hydrants, as determined by the District, based on the size which would be required to serve the parcel. The calculation of the contribution for existing facilities shall be based on the Front Footage Charge as set forth in Appendix B. The General Manager shall be responsible to determine the size of water main necessary for the development.

Where there is an existing distribution main in the public street from which a corner lot may receive water service from the District and a service connection is requested (except by a subdivider, who shall be required to pay the entire expense of the necessary main extension, including a circulating line) beyond the said corner lot and said requested service connection requires an additional main extension, the District will install, at its expense, the said necessary water main for the width of the said corner lot, or one hundred twenty-five (125) feet, whichever is the shorter distance. Distances shall be measured from the front lot line of the corner lot.
