Description of Nature, Purpose, and Beneficiaries of Project:

Due to multiple breaks along the 8" water pipeline in this area, a failure assessment was completed to determine the cause. Historical performance of the AC pipe and laboratory samples collected at one of the failure locations revealed that heavy loads from a nearby storm drain crossing caused the breaks. Consequently, the District staff has decided to relocate a small portion of the subject pipe to avoid further heavy loading of that pipe and reduce the risk of potential future main breaks.
